

WYOMING VACCINE DISTRIBUTION PROGRESS

February 5, 2021

Phase 1a December-Present

- Healthcare workers who are exposed to COVID-19
- Staff and residents of long-term care facilities
- Law enforcement
- Workers who have exposure to infectious materials

Wyoming counties began vaccinating people who fall into Phase 1a in December 2020. They continue to offer vaccinations to those who fall into this priority group who have not yet received their vaccine.

Phase 1b In Progress

- Individuals 65 years of age and older
- Some frontline essential workers who interact with the public

Counties are currently accepting pre-registration for individuals 65 and older. Due to limited vaccine supplies, counties may initially prioritize vaccine appointments and clinics for those 70 and older, then move to individuals 65-69 once supplies can accommodate additional vaccine administration. Additionally, some frontline essential workers are being vaccinated.

Phase 1b Coming Soon

- Individuals with specific medical conditions
- People on the Wyoming Medicaid Community Waiver and Developmental Disability Waivers
- Caregivers of medically vulnerable persons who are unable to get vaccinated

As vaccine supplies become more readily available, counties will begin vaccinating other priority groups within Phase 1b.
